How Things Work

A few quick notes before you settle in

AIR CONDITIONING & HEATING

The system is on a maintenance plan and is checked regularly to include filter changes. The thermostat should not be lowered below 72 degrees in the summer or over 78 in the winter. When you leave, please move the thermostat to 78 degrees in the summer and 60 degrees in the winter.

OUTDOOR FIREPLACE

Open the door under the pit to set your desired time length (in minutes) then close the door. The gas will turn on and you can use the dials on the exterior of the pit to control and start the flame. Once you are done, make sure the exterior dial is off and the timer dial within the fireplace door is off too.

PLEASE COVER WHEN COOL AND NOT IN USE.

OUTDOOR GRILL

Behind the grill is another gas control dial. Set your desired length (in minutes) then turn each dial on the grill 90 degrees to the left and press the igniter. Once the temperature begins to rise, lower your gas levels on the grill to control your temperature. **When done cooking, please use the provided grill brush to clean the grill and make sure all the gas knobs are switched back off.**

TRASH

Trash cans are located in the bear box outside. Please tie bags securely.

For Longer stays, additional trash runs may be required. Please contact the hosts if necessary.

HOT TUB

Uncover the hot tub, gently fold the cover in half, lift using the cover bar, then gently lower behind hot tub. From here you set your desired temperature and use the panel to turn on jets.

Please return the Hot Tub to 80 degrees upon checkout.

Pool Security

SECURITY AND ALARM SYSTEM

For your safety, the pool room is equipped with a doorbell system to alert the main level when the door has opened. Please do not tamper with or touch the alarm. This alarm will not be affected by the following instructions for the water motion alarm system.

The pool itself has a motion alarm system that will ring aloud throughout the house if someone enters before planned use. DO NOT UNPLUG ALARM IN KITCHEN.

How to turn off before use:

1. Locate the pool alarm system in the corner of the pool. Notice the 2 switches on the backside of the alarm.
2. When the right switch is flipped to off, the alarm system will be off.
3. When the right switch is flipped to on, the alarm system will be on.

IF ALARM IS SET AND SOMEONE GETS IN THE POOL, THE MOVEMENT OF THE WATER WILL TRIGGER THE ALARM.

How to reset after use:

1. Turn the system off (see above).
2. Make sure everyone is out of the water and let the movement of water settle, then turn the alarm back on and flip the left switch to reset.

THE POOL ALARM IS IN PLACE TO MAKE SURE THE POOL IS ONLY IN USE WHEN INTENDED BY GUESTS
